1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13, drawn to an organic EL device, classified in class 313, subclass 504.

II. Claims 14-26, drawn to a method of making the EL device, classified in class 427, subclass 58.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, one of ordinary skill in the art would be able to make the product of claim 1 by spraying or CVD deposition method or electronic beam deposition method etc. instead of the claimed anionic polymerization method.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit: 2879

their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Robert Goodell on 09/29/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
